Homework 7 for MATH 1260 Fall 2019

Due Thursday November 7

Reading: Chapter V Sections 5–8
Turn in solutions to all problems.

V.4: 10

V.5: 1c, 4

V.6: 3, 5

V.7: 1c, 5

V.8: 5, 7, 9

I also recommend looking at V.5.4 and reviewing problems 9, 11, and 12 from V.7, which we talked about in class. The first (usually multi-part) problem in each section provides, as always, a good set of warm-up exercises with which to gain fluency in the concepts and calculations.
