

The Fate of the Riemann Hypothesis: Timeline

Rich Schwartz:

A lot of people read my story *The Fate of the Riemann Hypothesis*. Many people liked it and many did not. I think that most people figured I had written the story as a reaction to the Riemann Hypothesis improvement that Anthropic announced around Aug 10.

In fact, I wrote the story in the beginning of August. I sent the story to a number of my math friends and also to a few of my colleagues at Brown. I sent a number of copies out on Aug 7. Here is a screen shot of one of these emails, with the name of my friend redacted.
